J. Zinni

L = Locked Door
S = Secret Passage

One Square = 5'

The time mage Mephestino has inadvertently set a blight upon the landscape. Using powerful time magic, he has created a temple to entrap an ancient evil power. Unfortunately for the neighboring people, this powerful magic has a hefty cost; it causes all of the foliage for miles to age rapidly. Anything planted on the landscape goes through its lifecycle within a day's time, leaving the soil barren and marred by death.

01. Entryway

Two tall onyx statues flank ivory doors. Dimly lit by wall sconces.

- » The doors slam shut, **magically locked** after entering, blowing out the sconces.
- » A massive relief of a human fighter is on the floor; a **giant golden inset** is where the eye should be.

PLACING THE GOLD GEM IN THE INSET: will open the doors to the temple, allowing the characters to escape.

02. The Crystal Shard

Naturally lit room, light pours through stained glass windows flanking a throne.

- » A **two-foot-tall bell** sits on a large platform in the middle of the room.
- » A **giant crystal** hovers above the bell, the shadow of a body is suspended inside.

RINGING THE BELL: causes the crystal to shatter, injuring anyone on the platform and releasing a skeleton wearing a crown.

PUTTING THE SKELETON ON THE THRONE: causes its mouth to open wide, releasing the **violet gem** held inside.

03. Pool Room

Unlit room, the air is humid.

- » Injured characters entering the pool for the first time **heal a minor amount**.
- » A **red gem** sits on an altar on the opposite side of the room.

04. Goblin Games

Dimly lit, smelling of sulfur and ash. Bits of burnt, broken furniture surround the room.

- » **d8+2 goblins** are playing a strange game where they hit each other with the furniture inside. They turn and playfully hit whoever first enters the room with a wooden chair.
- » A **large crimson relief** is on the wall at the northeast end of the room. It has an inset in the center of it.
- » An **enormous painting** of a battle is flanked by two sets of statues; one has its arm extended, holding a sword.

PLACING THE RED GEM IN THE WALL: causes the relief to split and slide open.

PULLING THE STATUE'S ARM DOWN:

causes a wall segment to slide, revealing a secret passage.

05. Small Keep

Unlit room, covered in a thin layer of dust.

- » Altar holding an **amber gem**.
- » **Treasure chest**, containing a **magic item** and a **trivial amount of coinage**.

06. Formal Room

Well-lit, magic users can sense extremely high-level magic focused on this room.

- » A **golden gem** sits on an altar surrounded by treasure inside a cage of magically bonded bars.
- » A small, **youthful figure** is lying on the ground facing the altar. It does not respond to any attempted contact.
- » **Four colored slots** surround a large crank on the wall (amber, emerald, aqua, and violet).
- » **Six large sculptures** of fighters flank the edges of the room.

PLACING THE GEMS: unlocks the crank, allowing it to be turned.

TURNING THE CRANK CLOCKWISE: slowly lowers the bars. A loud grinding noise can be heard from the passage. After ten rotations, the characters are ten years older. Inside the cage, a huge, **burly fighter** taunts the characters, **animating the statues** in the room and initiating combat.

07. Worship Room

Dimly lit, smells like candle wax, old paper, and incense.

- » A **massive painting** of angels of mercy flying above a battlefield.
- » **Two sets of statues** flank the painting; all but one have their hands in prayer pose.
- » **Large indigo relief** on the west wall has an inset in the center of it.

PLACING THE INDIGO GEM IN THE WALL: causes the relief to split and slide open.

INVESTIGATING THE STATUE NOT PRAYING: a small lever is hidden behind this statue; pulling it reveals the secret passage on the east wall.

08. Frozen Angel

Unlit room, noticeably colder than the surrounding rooms.

- » **Two unlit sconces** stand in front of a wall of ice with an angel statue frozen inside.
- » An **emerald gem** sits on an altar at the north end of the room.

LIGHTING THE SCONCES: causes the ice to melt, revealing a **secret passage**. A **healing potion** sits at the angel's feet.

09. The Pit

Complete darkness, silent.

- » An **eighty-foot deep** pit makes up most of this room; skeletons with shattered bones lay at the bottom.
- » An **aqua gem** sits on an altar at the west end of the room.

10. The Orc King

Naturally lit room, light pours through stained glass windows flanking a throne. It reeks of stale blood and smoke.

- » A **massive orc** is sitting on the throne, wearing a clockwork crown that holds an **indigo gem** in its center.
- » **d6 orcs** sit in front of the throne, feasting on a deer that they have roasted over an open fire in the center of the room.

11. The Passage of Time

Dimly lit passage with heavy stone walls. An arrow is embedded in the floor pointing inward. The column in the center holds a compass pointing north. Each of the ornate doors surrounding the passage is painted in a unique color.

When the characters enter a room, the passage spins in the shortest direction so that the arrow aligns with that room. As the passage moves, a loud grinding noise can be heard coming from it. The characters age a year for each door the arrow passes, moving clockwise. The characters become a year younger for each door it passes in the counter-clockwise direction.
