

The Ringbahn/ The endless trainride

1) "Gesundbrunnen": The train stops after a while, then you hear a voice: "Welcome aboard the Ringbahn. Leave the train immediately. The train will come back to pick you up when you're done. We wish you good luck.". The voice seems scary, but you still get out. After blinking once find yourself in a pond. You notice spiders coming out of holes in the floor. A spider bite makes you stop breathing for a few seconds. The spiders get out faster every second and you get bitten more and more. Your only way out is up or else you'll suffocate. You must try to climb all the 50 meters up. Luckily some bricks have fallen out so you can use the holes for climbing. The only problem: the spiders can climb too! Once you've gotten out, the train magically appears in front of you and you continue the ride!

2) "Ostkreuz": You see big DDR buildings. All of them make a huge maze. You must try getting out of there. Luckily there's a system! But there's also a shadow like creature following your every move. Once you've seen it it starts attacking you, but not physically, it can get into your thoughts. Once it's defeated it disappears.

3) "Tempelhofer Feld": Your surroundings look almost like a desert but with grass instead of sand with tons of stranded airplanes. The heat is nearly killing you and you pass out. Once you wake up, you're surrounded by weird creatures. They look like human skeletons made from bicycle pieces. You must quickly fight all of them. The difficulty is that once they get broken, they reassemble.

4) "Südkreuz": You're in a huge industrial center. After some breaths you start hallucinating. All of your biggest fears appear in front of you. You start fighting with them, causing you to lose most of your energy. You must find a gas mask to breathe and then defeat the gas creatures.

5) "Westkreuz": The luxurious station catches your eyes. It's covered with diamonds and gold. You're amazed and very distracted, so when a monster starts forming behind you from the surrounding diamonds it manages to scare you getting an advantage in the following fight. This monster combines most of the other creatures abilities. It can get into your mind even causing hallucinations (every 5 minutes), it can shoot diamonds which make you forget how to breathe for a few seconds (every 2 minutes) and it can reassemble itself after it's broken. It does have weaknesses. Can you defeat it?

Congratulations if you were able to destroy the end boss and escape the cycle. If else you will soon forget about the past few events and start the whole dungeon again.
